

Flow 2: Email Drip (the forever follow-up)

Runs by email, so the 24-hour DM limit doesn't apply. Before every send: **patreon_member** not set AND **drip_paused_30d** not set → otherwise stop.

MR. WIRED **UP** · ManyChat

Launch sequence (first 14 days)

✉ Day 1 · What Patreon is

"My Entire Mash Up Catalog" is \$8/mo: 460+ mashups plus full-length mixtapes. Less than a coffee run.

✉ Day 3 · Behind the scenes

The mashups too long, too wild, or too risky for socials live on Patreon. [3 recent drops]

✉ Day 5 · Social proof

"[Patron quote]". Patrons get first listen and requests.

✉ Day 7 · Request hook

Got a combo you've always wanted? Patrons request it and I make it.

✉ Day 10 · "Why pay?"

The free stuff stays free. \$8 streams everything, \$20 gets MP3s for your own sets.

✉ Day 14 · Soft urgency

This month's exclusive drops [DATE]. Join before then and it's yours.

🕒 Smart Delays between each step · 💎 Condition check before each send

Every email has 3 buttons: **Join Patreon** 🔥 · **I already joined** ✅ (asks for Patreon email → tags patreon_member) · **Not right now** (tags drip_paused_30d for 30 days)

Evergreen loop: one email every 7 days, rotating forever

E1 · New drop

"Just dropped [TITLE]. Patrons already have it."

E2 · Monthly recap

"Everything patrons got this month."

E3 · Request spotlight

"A patron asked for [A] x [B]. I made it."

E4 · Behind the board

Ableton/CapCut clip of a mashup getting built.

E5 · Milestone

"850 paying patrons. Help me hit 1,000."

E6 · Price anchor

"\$8/mo = 460+ mashups. Under 2¢ a track."

E7 · Personal

"Why I started doing this daily..."

E8 · Direct ask

"Straight up: Patreon is the best way to support it."

↺ after E8, back to E1 (refresh E1, E2 and E5 monthly)
